

TRAMIGO

TRACKING & CONNECTIVITY

COMPANY

PROFILE

ABOUT TRAMIGO

Tramigo is a IoT tracking and connectivity pioneer with global presence since 2002. The Group headquarters are in Finland, but Tramigo operates globally with sales, support, and operational staff on all continents providing complete life-time support for its end-customers and authorized resellers.

Tramigo develops and offers complete, easy-to-use solutions for mission critical fleet management, vehicle security and valuable assets tracking as well as push-to-talk solutions. Our technology is in-house developed over two decades and includes hardware, firmware, software, accessories of choice.

All solutions come with truly global multi-network IoT connectivity covering 700+ networks in 200+ countries ensuring best possible coverage. The solutions are highly customizable and have several industry unique features to ensure both a broad spectrum of use cases as well as high customer satisfaction and ultimately peace of mind.

- Government, Public Safety and Security
- Mining and Oil & Gas
- Construction

MISSION CRITICAL FLEET MANAGEMENT

Reliably manage and secure your fleet and cargo even in the most demanding environments.

FOR VEHICLE TRACKING & OBD DIAGNOSTICS

Solutions built on a flexible and modular combination of security and convenience.

FOR VEHICLE SECURITY FOR PRIVATE CAR OWNERS

GPS tracking and private vehicle security for vehicle owners who require an extra layer of security.

FOR ASSET TRACKING AND MONITORING

For businesses looking to secure and protect valuable assets and equipment.

FOR BROADBAND COMMUNICATION

Mission Critical Push-To-Talk (PTT) for best possible voice quality and integrity.

SOFTWARE SOLUTIONS

Tramigo software solutions are designed to deliver advanced fleet management features conveniently packaged in one service and accessible on any device.

TRAMIGO CLOUD

TramigoCloud delivers customers all the benefits of a top-end enterprise fleet management software system behind a secure web login. With constant centralised updates the latest features are always immediately available to all of our security focused customers.

TRAMIGO APP

A convenient mobile tracking solution for private vehicles and SME fleets. Designed to be compatible with all Tramigo's hardware options. Whether you have a small or a large fleet, are looking to track vehicles for personal or business use.

MCPTT SOFTWARE SOLUTIONS

Tramigo offers three software solutions for the MCPTT. A user-friendly Web-Admin designed for creating, adding, and removing users and groups. The Windows PC MCPTT Control Center for monitoring, tracking device's location, and communicating directly to devices. Mobile Android App dispatcher designed to allow communication with small groups and control center and track devices location as well.

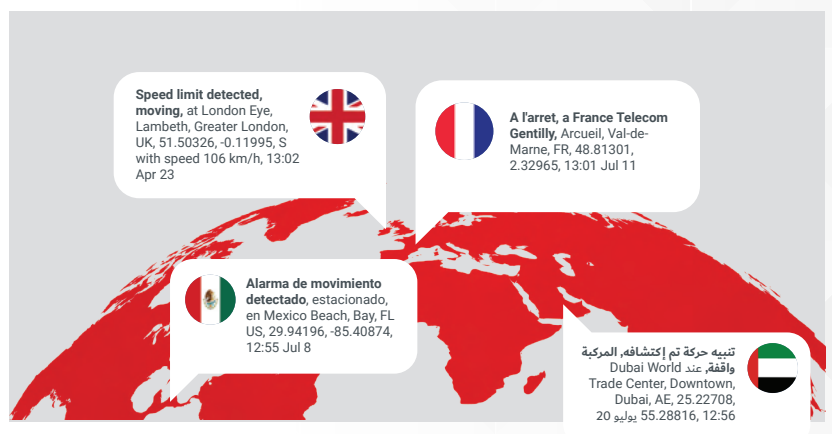

M1 FLEET ENTERPRISE

Tramigo M1 Fleet Enterprise is a self-hosted client-server application that together with Tramigo's tracking platforms help you efficiently track, monitor, and manage your fleets. It is recommended for recovery and tracking service providers or anyone who has a large fleet.

Tramigo's software are a result of more than 20 years of in-house development and listening to our customers needs and special requests. With API's the softwares can be integrated to most ERP's.

TRAMIGO LANDMARK DATA

- 1 Tramigo Landmarks is an exclusive feature that helps users locate their Tramigo by utilizing practical and easy-to-understand local landmarks. Tramigo landmarks are updated several times per year and are available for every country in the world.
- 2 Tramigo device references its location to the nearest landmark – a public building, intersection, restaurant or other place you are likely to be familiar with – instead of just sending hard to understand GPS coordinates.
- 3 The preloaded Landmarks are sent directly from Tramigo devices to the user to understand the location of the device even when Internet access is not available.

IOT SOLUTIONS

Tramigo connectivity is designed to ensure that you as a customer can rely on the best possible coverage regardless of the country you operate in.

Our multi-network connectivity means that your Tramigo device will always connect to the best network in each country making the coverage better and stronger even as you cross country and network borders in remote areas.

With a truly global coverage we can ensure you don't lose your vehicle or asset from the radar when crossing country borders and always stay connected with your team.

TRAMIGO FLEET SIM

is designed to work with private vehicles to large fleets and offer seamless crossborder connectivity with affordable prices in the toughest emerging markets in the world.

TRAMIGO IOT SIM

cards are designed to be used in M2M / sensors / IoT hardware solutions operating in 2G, 3G, 4G, 5G or CATM1 networks. Optimal coverage ensured through multi-network connectivity.

TRAMIGO OEM eSIM

profile offers the widest multi-network global coverage with affordable data plans. cards designed to be embedded in IoT hardware solutions on 2G, 3G, 4G, 5G or CAT-M1 networks.

MISSION CRITICAL PUSH-TO-TALK SOLUTIONS

Introduced in 2021 Tramigo MCPTT is designed to meet the performance needs of public safety and other users that rely on mission-critical communications. Designed for sectors depending on high reachability, availability and reliability. Furthermore, the solution offers low latency, real-time operating capabilities, high levels of security, private and group communications, and the ability to provide prioritisation, with a guaranteed quality of service.
