

# M1 FLEET ENTERPRISE FUEL CONSUMPTION ANALYSER

M1 Fleet Enterprise provides detailed fuel consumption reports, fuel level at trip start and at the end, average fuel consumption, refuelling and fuel draining and more. The M1FE can be also self hosted.

## KEY FEATURES

- Download fuel data in several format
- Generate reports
- Convert data into simple charts that help you understand and analyse information
- Collect data and compare

## SUITABLE FOR

- Fleet management
- Service providers
- Cars and vans

## ADVANCED FUEL GAUGE

Works with only T23 Fleet T24 fleet the advanced fuel gauge monitoring is used for fuel level monitoring using vehicle's own fuel gauge. It helps to detect and prevent fuel theft and has alarm functionality by directly connecting to vehicle's existing fuel gauge. Always consult senior tech support before attempting to install this feature. Note: check in advance the vehicle model supports this feature.

## KEY FEATURES

- Monitor periodic fuel volume with status report
- Compare fuel gauge reading with M1Fleet Enterprise fuel consumption estimates based on trips

## SUITABLE FOR

- Fleet management
- Service providers
- Cars and vans

# TRAMIGO FUEL MANAGEMENT

## FUEL MONITORING OPTIONS FOR VEHICLES & STATIONERY TANKS

T23 and T24 Fleet supports various analog / 1-wire sensors for special needs in fleet management. Tramigo offers several fuel management options:

## TRAMIGO FUEL PROBE

An advanced fuel probe that works with T23 or T24 Fleet tracking hardware. Using M1 Fleet Enterprise monitoring system, it allows fleet owners to provide a high-precision measurement of fuel level in the tank, and gives detailed information about fuel tank filling and draining. This helps in preventing fuel theft, draining and unauthorized use of fuel.

Fuel probe is for professional usage only. Requires advanced knowledge of fuel monitoring principles and in-depth technical knowledge of fuel level system installation. Fuel support and training is available.

### KEY FEATURES

- Monitoring periodic fuel volume with Status report
- External fuel level sensors
- Fuel refills or drains
- Trip consumption report
- Fuel consumption report
- Fuel consumption during idling

### SUITABLE FOR

- Advanced fleet management
- Trucks
- Heavy machinery
- Fuel storage tanks
- Standalone machinery
